

Capital Regional District

Regional Water Supply Low Water Pressure

From December 1, 2022 to approximately December 12, 2022, the Capital Regional District will be transferring the source of supply for the Greater Victoria Water system from Sooke Lake Reservoir to the Goldstream Reservoir System in order to inspect the Kapoor Tunnel.

As a result, lower water pressure may be experienced in Langford, View Royal, and Saanich north of the TransCanada Highway. No interruption of service is expected. Residents may notice a slight change in the colour and taste of the water, however the water remains safe to drink.
