

View Royal Supports Chickens & Bees

CHANGES IN VIEW ROYAL

In 2009 the Town's Sustainability Task force presented a series of recommendations to Council on ways that the Town could become more sustainable. One of the recommendations was to allow the keeping of chickens and bees in residential areas. This was intended to meet two different needs. The keeping of a small flock of chickens on a residential property produces a steady supply of eggs for household use, as well as excellent fertilizer for the garden! Bees in a neighbourhood aid greatly in pollination of fruit trees and gardens and as an added side benefit produce honey and beeswax.

To enable these recommendations, Council amended the Land Use Bylaw and the Animal Control Bylaw. The basic "rules" for each are as follows:

CHICKENS

Chickens are permitted in the R-1, R-1A and R-1B zones with the following restrictions:

- No more than 4 hens may be kept on a property, all of which must be over the age of 4 months;
- Roosters are prohibited in all residential zones;
- The sale of eggs and meat is prohibited in all residential zones;
- The slaughter of chickens is prohibited in all residential zones;
- Henhouses shall be located in the rear yard of a residential property and must be set back a minimum of 3 meters from the rear, side and flanking lot lines;

If you're interested in having chickens on your property, Westshore Recreation may sometimes offer courses. To check availability please go to www.westshorerecreation.ca

BEES

Bees are also permitted in the R-1, R-1A and R-1B zones with the following restrictions:

- On properties up to and including 650 m² no more than 2 beehives are permitted;
- On properties greater than 650m² no more than 4 beehives are permitted;

To ensure the proper height of a honeybee flight path:

- the top of a beehive must be situated 2.4 meters or more above ground level; or
- the beehive entrance must be directed away from all neighbouring properties and the beehive must be situated behind a solid fence or hedge that is a minimum of 1.82 meters in height and runs parallel to the property line; or
- a beehive must be located a minimum of 7.5 meters away from any rear, side and flanking lot lines.

For beginner and intermediate Beekeeping courses see Royal Roads Continuing Education for offerings at <http://www.royalroads.ca/continuing-studies/>. There is also the Capital City Beekeepers Association at <http://victoriabeekeepers.ca/>
