View Royal Fire Rescue

Below is a picture of View Royal's Engine 38 and other departments from the South Island in Williams Lake B.C. One of the many tasks they have taken on since being deployed to assist in this devastating wild fire season was to protect this mass storage yard of logs, as well as to protect the mills themselves. As crews from all over the Island as well as other parts of the world are still being rotated in and out of the interior we wish for and thank all those involved with keeping our beautiful province safe.
