October is Cyber Security Awareness Month in Canada

Cyber Security Awareness Month is an internationally recognized campaign held each October to help the public learn more about the importance of cyber security. The campaign helps Canadians stay secure online by teaching them simple steps to protect themselves and their devices.

In our increasingly connected world, cyber threats can pose significant risks to individuals, organizations and communities. But through our collective efforts, we can educate, empower and protect ourselves and those around us. By taking steps, like sharing [Get Cyber Safe](#)'s posts on social media, talking to our coworkers, friends and family about cyber security, and practicing good cyber security habits ourselves, everyone can make a difference.

Together, we can raise the bar for cyber security in Canada and create a safer future for generations to come. Learn more at: [Get Cyber Safe](#).
